

Frame

Frame auto-creates shared albums from your events so everyone gets the memories, effortlessly.

The Problem

Memories get scattered across devices, leaving one person to manually collect and share them.

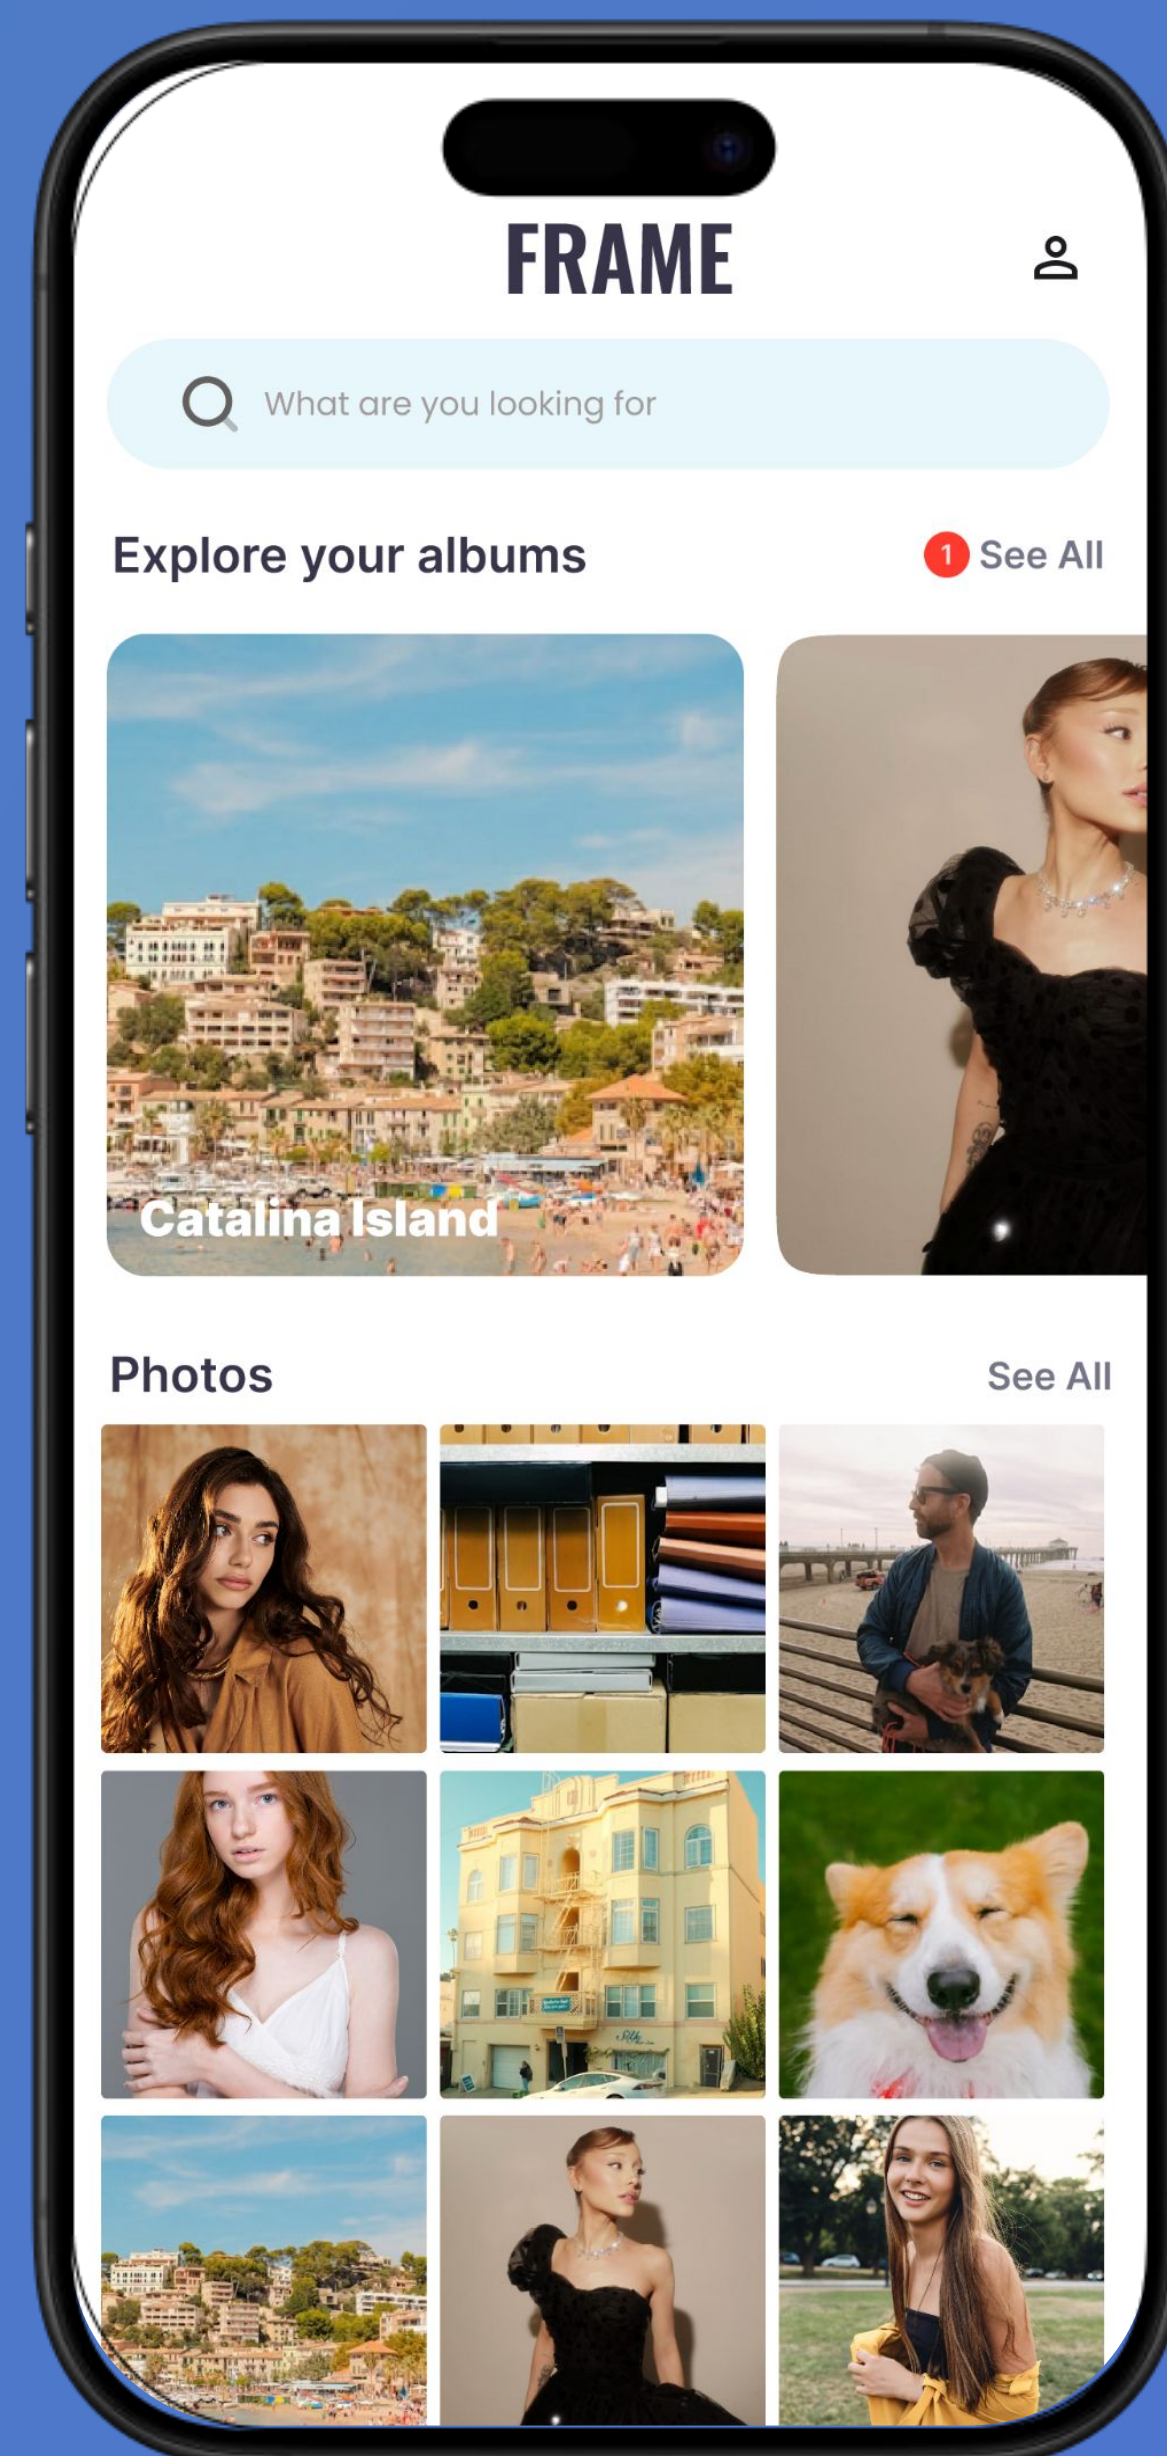

The Solution

Frame automatically groups event photos into shared albums and syncs them across friends.

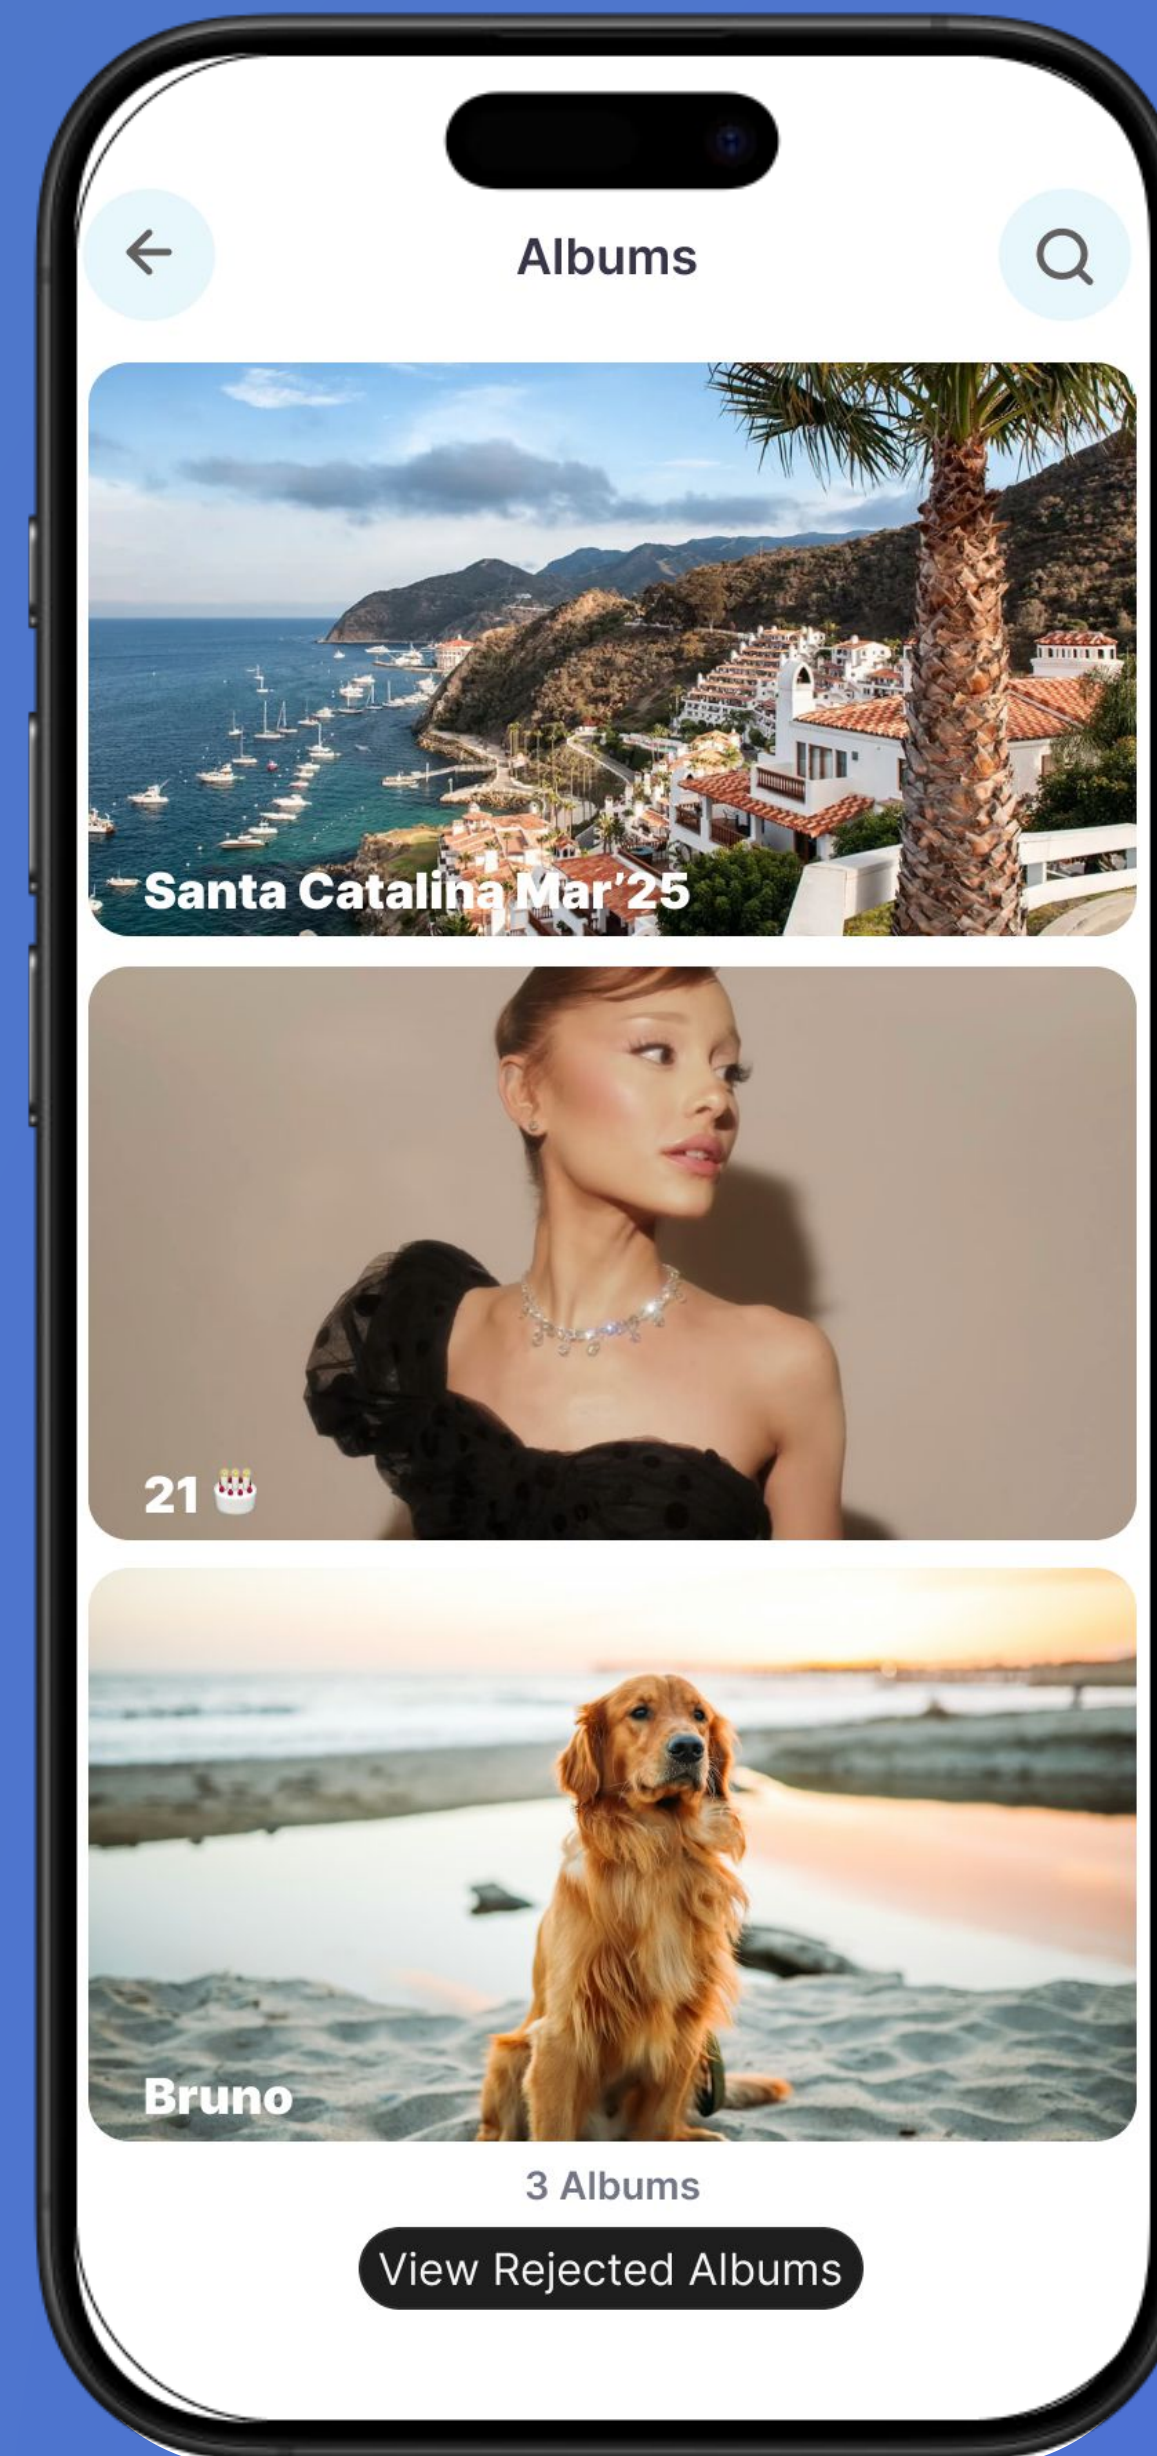

Key Features

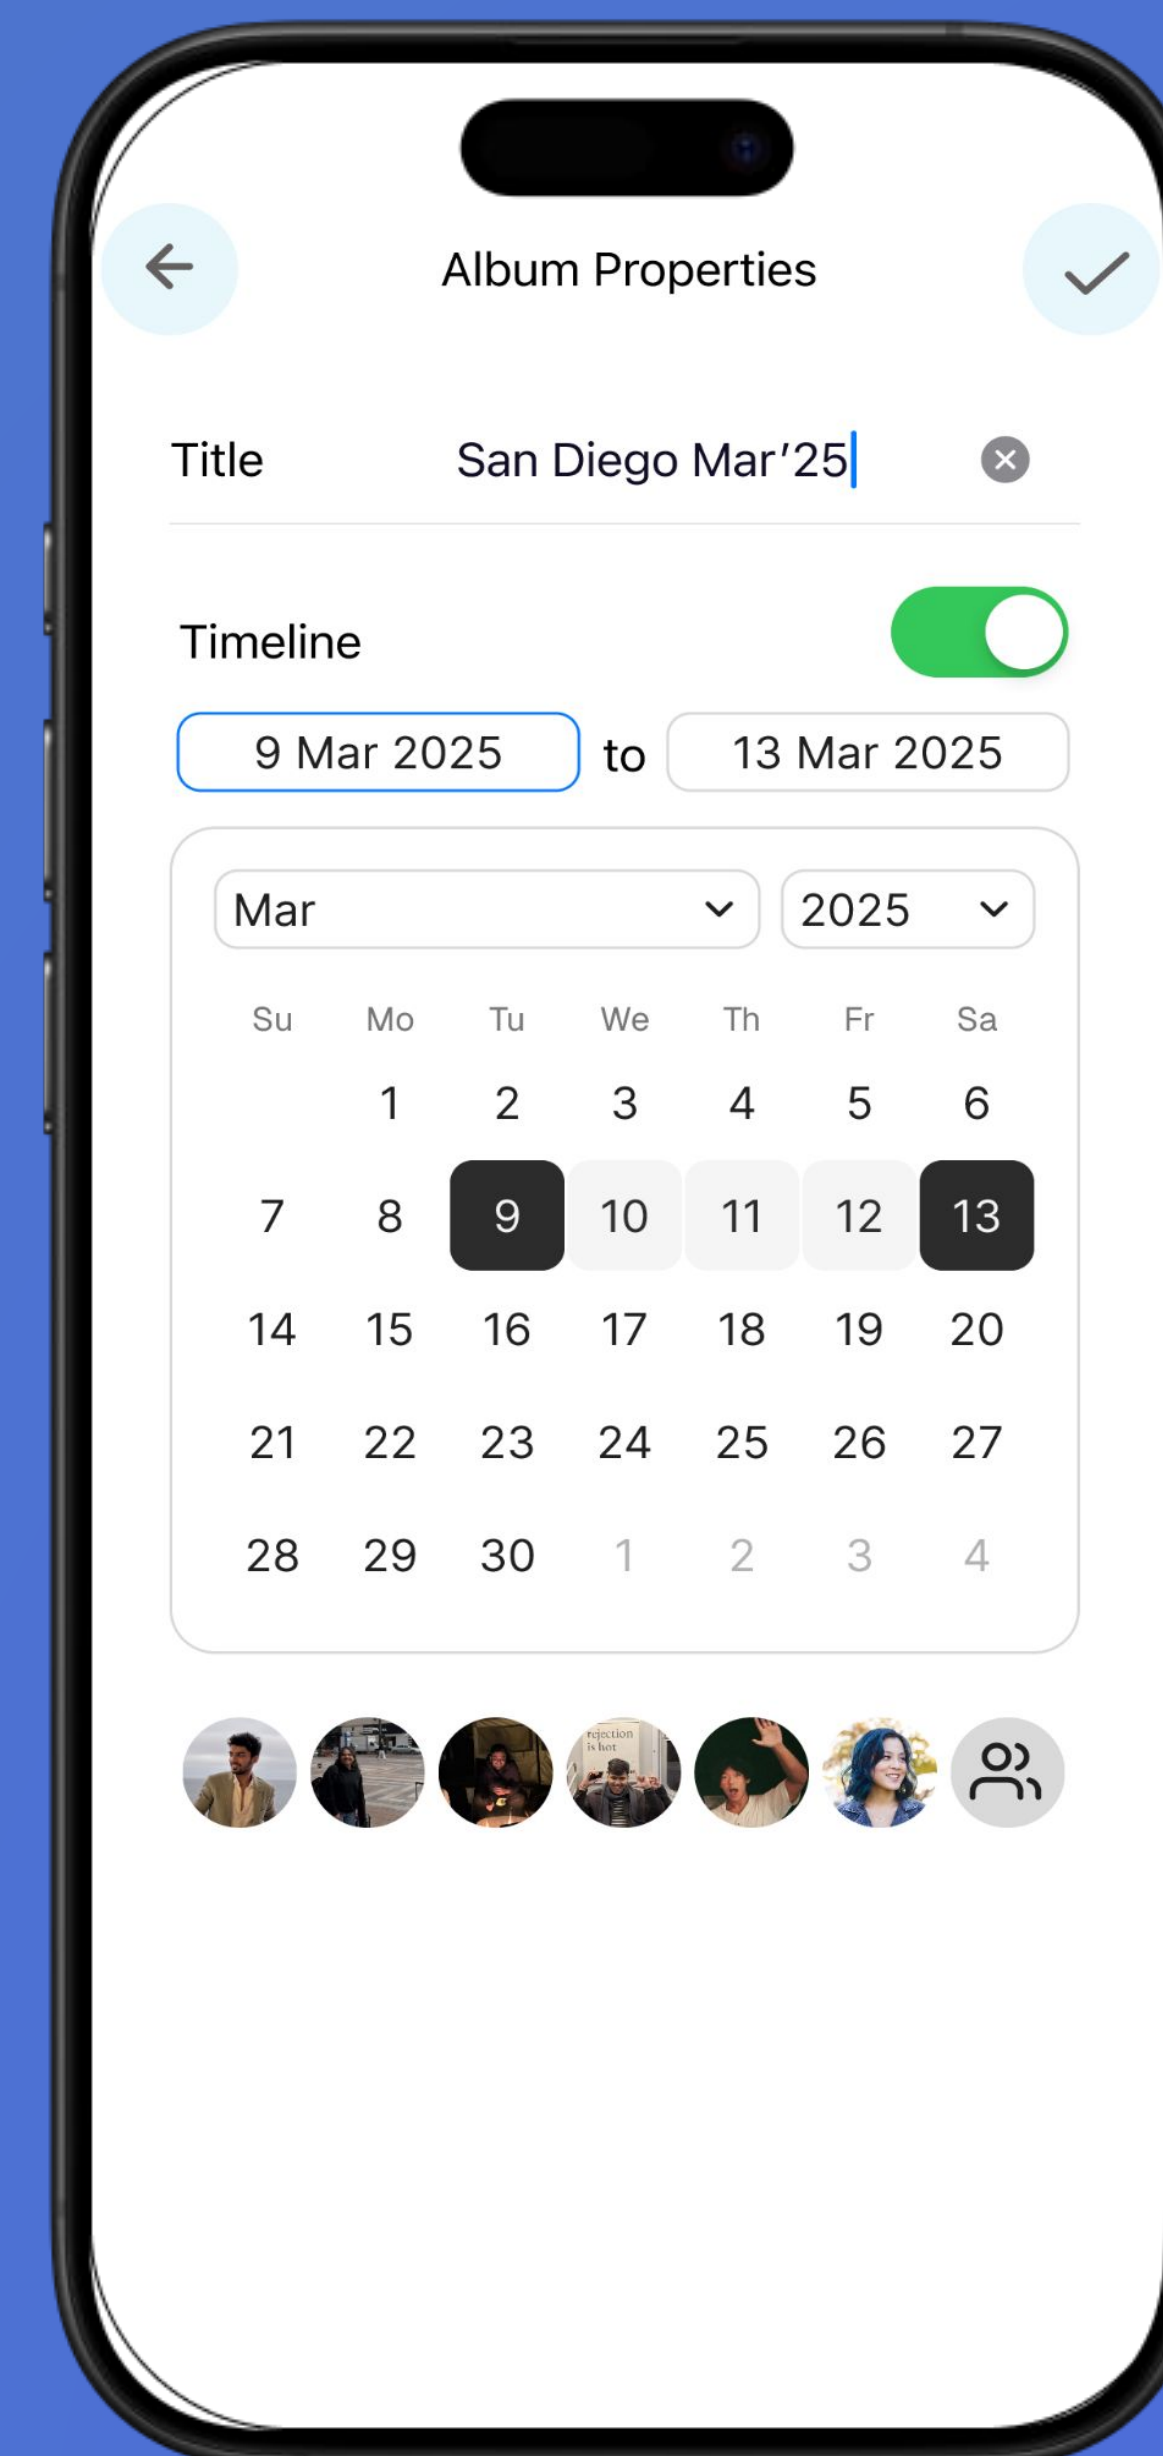

Notifies you with automatically curated albums

Keep track of all photos taken and received

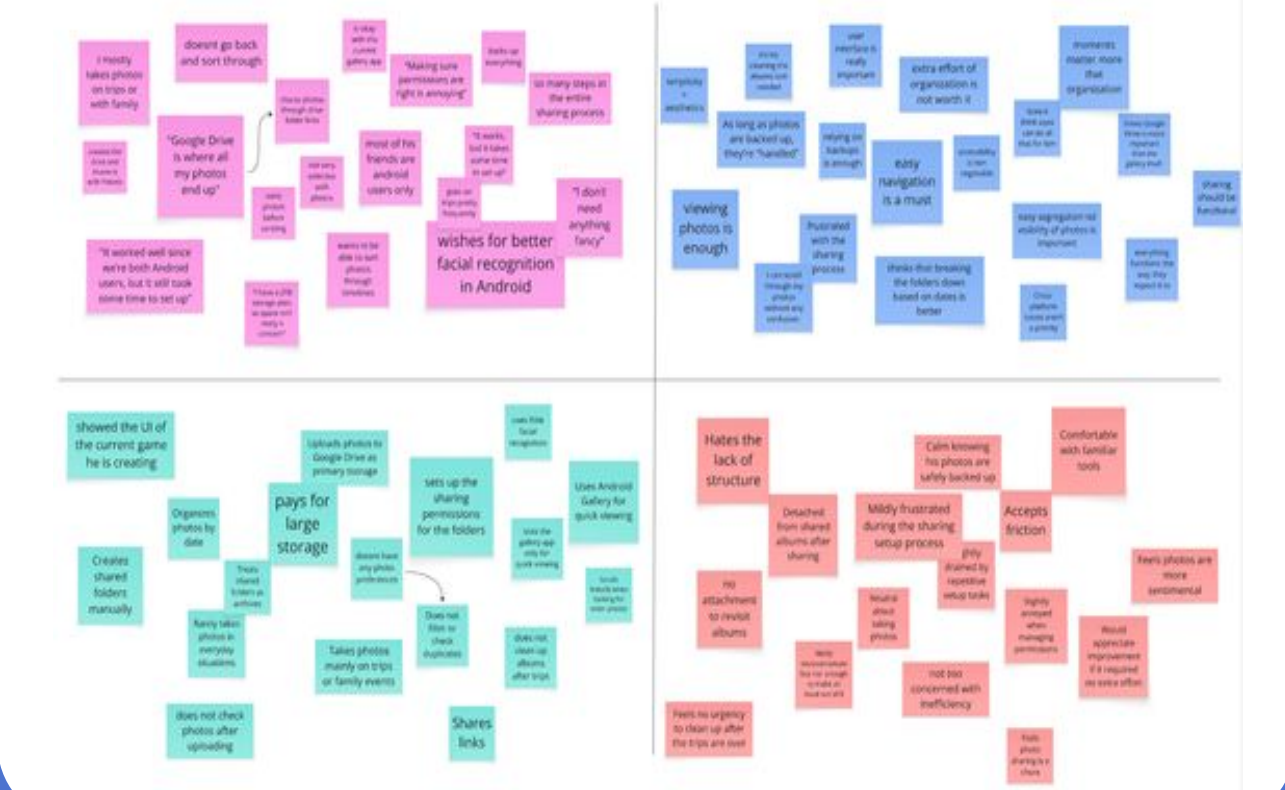

Easily visualize all albums as well as recently deleted ones

Edit the timeline and access restrictions for all albums

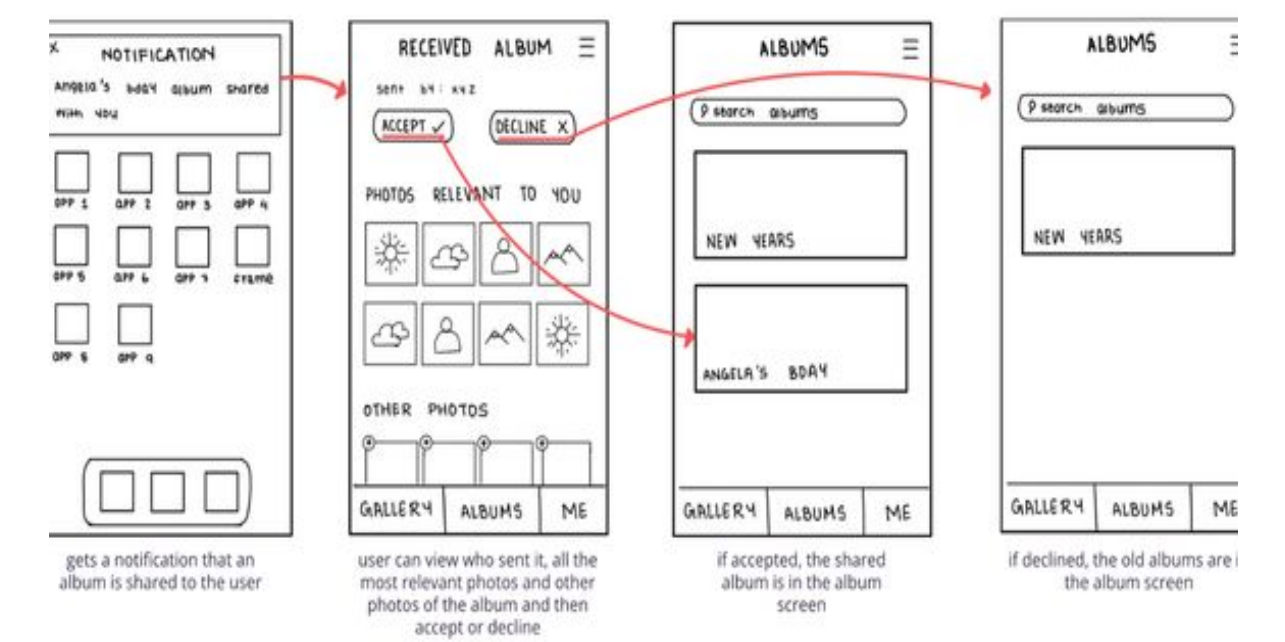

Needfinding

Testing

Low Fidelity

Medium Fidelity
